Forward

Company
Profile

About Our Company

Al Marsa stands as a trusted partner in fabrication, installation, and industrial services, providing comprehensive and customized solutions across sectors such as oil and gas, construction, infrastructure, and manufacturing. With specialized capabilities in structural steel fabrication, piping, machining, surface treatment, and on-site installation, we ensure every project is executed with precision, efficiency, and adherence to international standards.

From storage tanks to structural components, from CNC machining to hydro-testing, our end-to-end services are designed to meet the evolving needs of industrial operations. Backed by skilled professionals and advanced technologies, we are committed to delivering reliable quality, timely execution, and customer satisfaction at every stage.

Our Vision

To be a leading industrial service provider recognized for engineering excellence, innovation, and integrity in every solution we deliver.

Our Mission

To provide high-quality fabrication, installation, and industrial services by combining technical expertise, advanced machinery, and a customer-focused approach, ensuring safety, reliability, and continuous improvement in all we do.

Fabrication, Installation & Industrial Services

Al Marsa delivers complete fabrication, machining, surface treatment, testing, and installation solutions designed to meet the evolving demands of modern industry. By combining technical expertise with a commitment to quality and on-time execution, we support projects in oil and gas, manufacturing, construction, and infrastructure, ensuring every component and structure performs with precision and reliability.

Engineering Strength
from **Concept to
Completion.**

Storage Tanks (Static Storage)

Supply & Fabrication Services

We specialize in the design, fabrication, and installation of high-performance static storage tanks tailored for a variety of applications. From horizontal and vertical tanks to jacketed tanks and enclosed skips, every unit is crafted in compliance with global standards like API 650 and ASME, offering durability, safety, and efficiency for critical storage needs.

We offer comprehensive design, fabrication, and installation of custom and standard storage solutions, including:

- Horizontal Storage Tanks
- Vertical Storage Tanks
- Fixed Roof Tanks
- Jacketed Tanks
- Skip Tanks (Portable/Waste Tanks)
- Enclosed Skips

All tanks are fabricated in compliance with relevant international codes such as API 650, ASME, and tailored to meet client-specific standards.

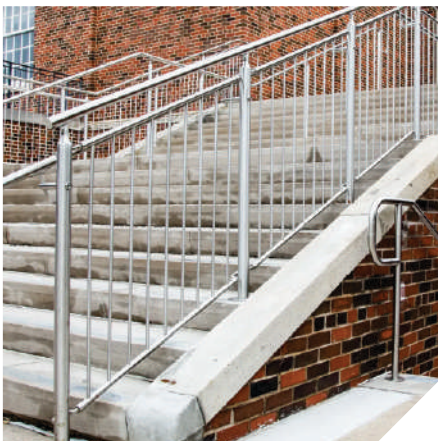

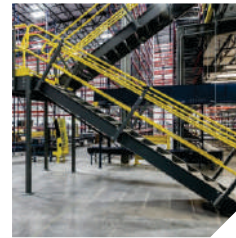

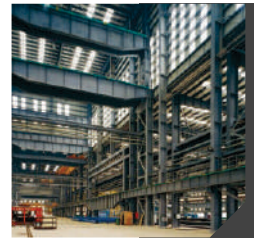

Structural Steel Fabrication

Our structural steel fabrication services deliver robust and accurate components that form the backbone of industrial and commercial infrastructures. Whether it is PEB structures, grating covers, staircases, or warehouse frames, we manufacture each element with precision to ensure seamless integration, structural integrity, and long-term performance.

We deliver precise and durable structural components for a wide range of industrial and commercial applications:

- Pre-Engineered Building (PEB) Structures
- Industrial Structures
- Staircases and Stringers
- Grating Covers & Trench Covers
- Car Shed Structures
- Warehouse & Workshop Structures
- Cage Ladders
- Handrails
- Embedded Steel Components
- Anchor Bolts

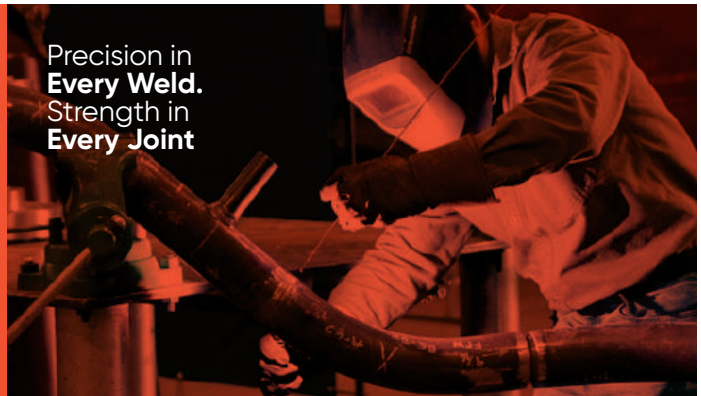

Pipe Fabrication & Welding Services

We provide end-to-end pipe fabrication and welding services using certified techniques and experienced personnel to meet complex project specifications. From prefabricated spools and onsite pipe laying to custom reducers and manifolds, our solutions ensure strength, leak-resistance, and compliance with the most demanding industrial standards.

- From prefabrication to installation, we cover all aspects of piping systems with certified procedures and skilled manpower:
- Pipe Spools Fabrication
 - On-Site Pipe Laying & Installation
 - Pipe Supports Fabrication
 - Plate Flanges Fabrication
 - Reducers (Concentric & Eccentric)
 - Manifold Fabrication

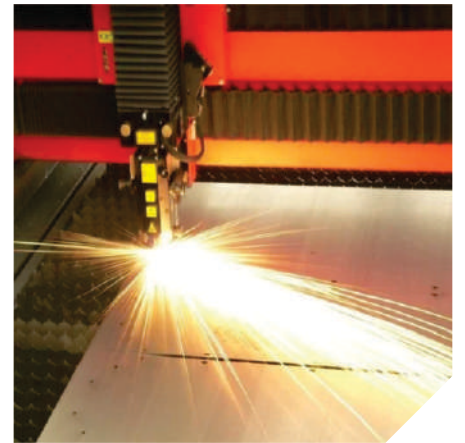

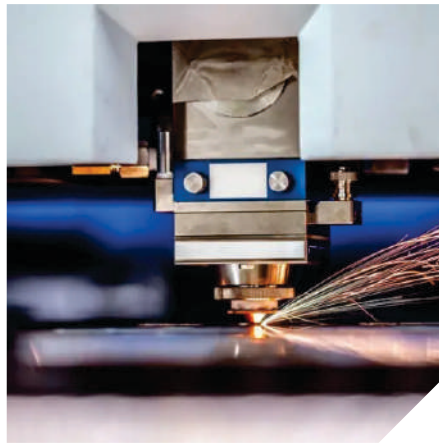

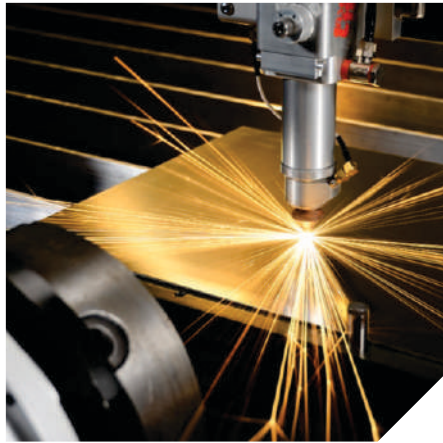

Precision Laser Cutting Services

Our laser cutting division offers high-speed and high-accuracy cutting services for stainless steel and carbon steel up to 80mm thick. With advanced laser technology and expert operators, we deliver clean cuts, intricate patterns, and consistent quality to support fabrication and finishing needs across industries.

We provide high-accuracy laser cutting solutions for a variety of thicknesses and materials:

- Stainless Steel – up to 80mm
- Carbon Steel – up to 80mm

Cold Rolling Services

AI Marsa offers expert cold rolling services for plates, pipes, bars, and custom profiles. Our rolling processes support both structural and pressure-based applications, delivering precise shapes, smooth finishes, and stress-resistant components that meet stringent engineering and project requirements.

Expert rolling solutions for structural and pressure-related components:

- Plate Rolling
- Flat Bar Rolling
- Pipe Rolling
- Angle Bar Rolling
- Reducer Rolling (Concentric & Eccentric)

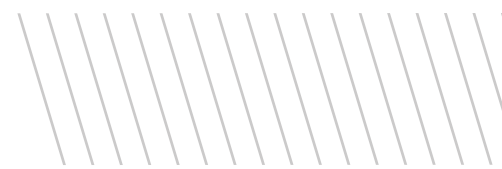

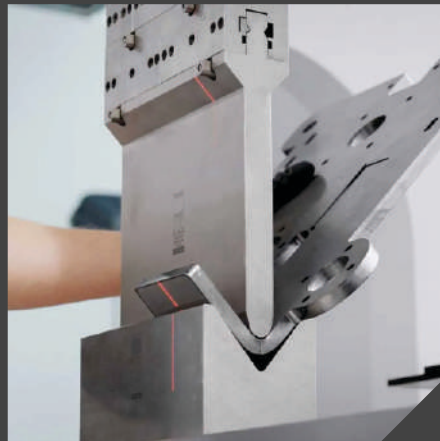

CNC Bending Services

Our CNC bending services utilize advanced technology to shape plates, pipes, and angles with exceptional accuracy and repeatability. Whether for structural frames or customized assemblies, we ensure each bend meets the required specifications and tolerances, enhancing fabrication outcomes across applications.

Advanced forming and shaping services with precision-controlled CNC technology:

- Angle Bending
- Plate Bending
- Pipe Bending

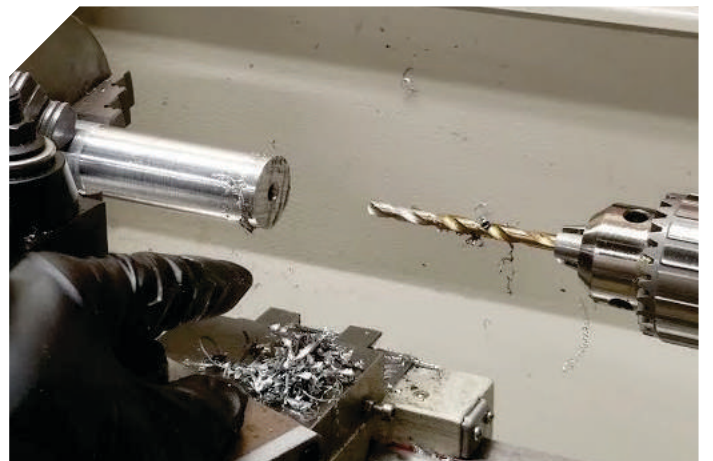

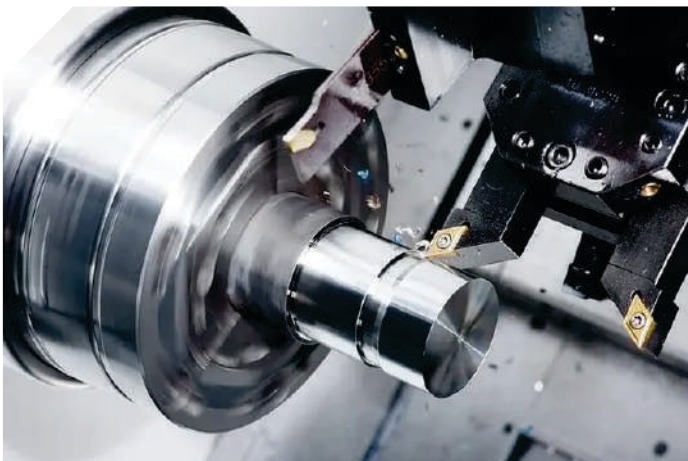

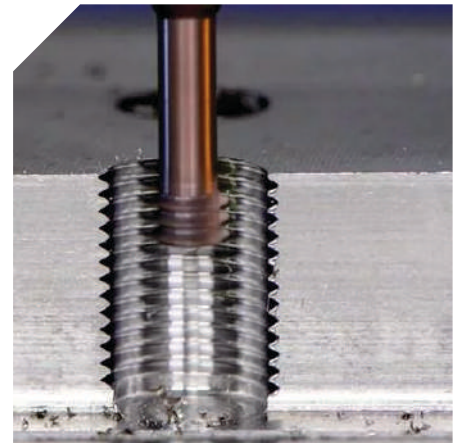

Machining Services

We offer a full spectrum of machining services using both CNC and manual equipment to handle turning, threading, milling, shaping, and drilling operations. This comprehensive setup enables us to deliver high-precision components for critical assemblies, repair jobs, and specialized industrial applications.

Equipped with modern CNC and manual machines, we offer a full suite of machining operations:

- CNC Turning & Threading
- Milling
- Thread Cutting
- Shaping
- Drilling

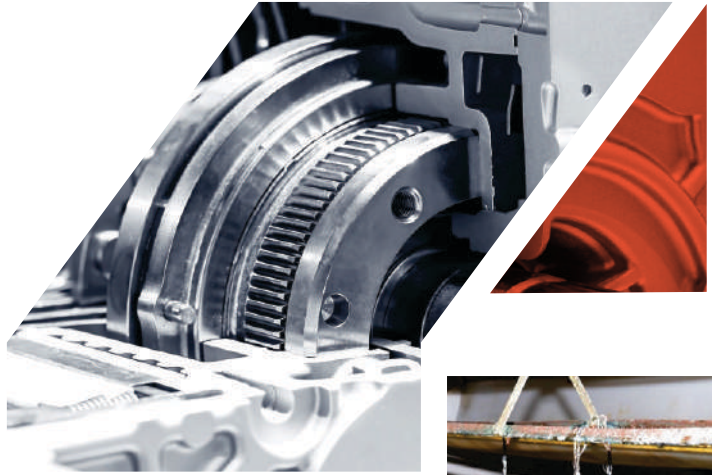

Metal Surface Treatment

Our surface treatment services are designed to enhance the durability, corrosion resistance, and visual appeal of metal components. From abrasive blasting and epoxy painting to galvanizing and enamel coatings, we apply the right protective finish to match environmental conditions and operational demands.

Enhancing durability, corrosion resistance, and aesthetics through specialized coatings:

- Abrasive Blasting
- Enamel Coatings
- Epoxy Paint Systems
- Galvanizing

Hydro-Testing Services

(In-House & On-Site)

We conduct professional hydro-testing to verify the integrity and pressure performance of tanks and pipelines. With capabilities for both in-house and on-site testing, our services comply with ASME, API, and client-specific protocols, ensuring systems are safe, leak-proof, and ready for operation.

Ensuring the integrity and safety of tanks and pipelines with professional hydro-testing:

- In-House Hydro-Testing for Skid Tanks & Prefabricated Spools
- On-Site Hydro-Testing for Field-Installed Tanks & Pipelines
- Testing per ASME, API, and client-specific protocols

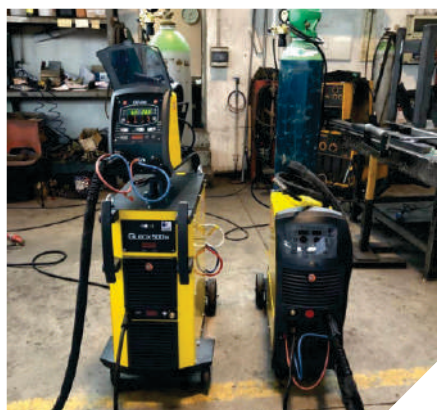

Rental Equipment Services

Al Marsa supports project continuity and flexibility through reliable rental equipment solutions. Whether you need welding machines, HDPE fusion tools, or chemical storage skip tanks, our rental fleet is maintained for performance and safety to keep your operations running efficiently.

We provide temporary equipment to support your operations:

- Chemical Storage Skip Tanks
- Welding Machines
- HDPE Welding Equipment

On-Site Installation Services

Our field teams provide comprehensive installation services for structural steel systems, piping networks, access components, and custom-built facilities. With experience across industries and project scales, we ensure accurate assembly, structural safety, and seamless integration on every job site.

Full-scope installation support with experienced field crews:

- PEB Structures
- Pipe & Pipe Support Systems
- Industrial Structures
- Staircases, Stringers, Gratings
- Car Sheds, Warehouses, Workshops
- Ladders, Handrails
- Embedded Steel Components

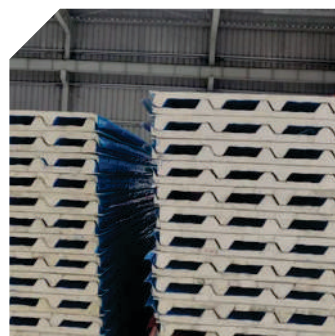

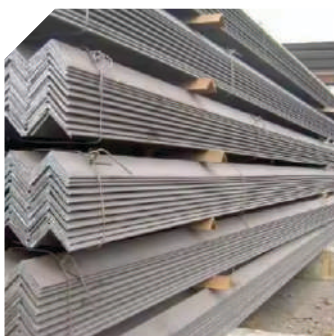

Material Supply Services

We offer dependable sourcing and supply of industrial-grade materials including beams, plates, pipes, fasteners, roofing panels, and instrumentation tubing. Each product is selected for quality and compatibility, helping clients meet procurement schedules and maintain consistent build standards.

We source and supply a wide range of industrial-grade materials:

- Plates, Angles, Beams
- Round Bars, Rebars
- Roofing Sheets (Shinko & Sandwich Panels)
- Fasteners & Anchor Bolts
- Pipes, Flanges, Gaskets, Fittings, Valves
- Instrumentation Tubes (SS & CS)

Why Choose Us?

- Certified welders and procedures (WPS/PQR)
- Adherence to ASME, API, ASTM, and ISO standards
- In-house QC, NDT, and project documentation support
- Timely project delivery & turnkey capabilities
